Technical–commercial leader operating at the intersection of engineering, operations, and go-to-market strategy.

Experienced in owning full lifecycle deployment of complex, regulated systems — from technical design and compliance to commercialization and stakeholder adoption. Proven ability to translate deep technical processes into scalable business value, align cross-functional teams, and serve as a trusted interface between technical and executive stakeholders.

Builder by mindset. Structured systems thinker with execution bias.

CORE COMPETENCIES

- Solutions Engineering & Technical Pre-Sales
- Cross-Functional Leadership
- Go-to-Market Strategy
- Stakeholder & Executive Communication
- AI-Enabled Workflow Design & Technical Value Translation
- Systems Architecture & Optimization
- Commercialization of Regulated Products
- Scalable Operating Models

EXPERIENCE

HEAD OF IT & OPERATIONS (TECHNICAL & COMMERCIAL LEAD) — 2023 - Present.

Really great company, Copenhagen

Circular waste-to-fertilizer production platform operating under local and EU regulatory frameworks.

- Led end-to-end technical infrastructure and operational architecture for regulated production systems
- Co-designed and executed construction of full-scale production facility, translating regulatory, operational, and process requirements into physical infrastructure prior to launch.
- Directed regulatory approval under EU Regulation (EC) No 1069/2009, securing compliant authorization for commercial production
- Designed compliant process flows and digital traceability systems supporting scalable operations
- Acted as primary technical-commercial interface between authorities, investors, and B2B clients

Impact:

- Displaced incumbent market leader Daka and secured Bella Operations (3 hotels + major Copenhagen convention centre) as anchor enterprise client prior to operational launch
- Closed €80–100k annual contract covering 4 locations (200–250 tons annually) following 1–2 month sales cycle
- Secured enterprise revenue commitment prior to operational launch, de-risking initial scale-up phase.

CO-FOUNDER 2021 - Present.

Really cool start-up, Copenhagen

EU-regulated skincare brand serving thousands of customers through compliance-driven product development.

- Co-developed and commercialized cosmetic products for EU market
- Managed cross-border supplier collaboration, formulation validation, and CPSR documentation
- Owned regulatory documentation alignment and safety compliance processes
- Built full digital go-to-market infrastructure (Shopify, lifecycle marketing, CRO optimization)
- Led technical communication between manufacturer, regulatory partners, and market

Impact:

- Acquired 2,247 customers through digital channels
- Achieved 25.43 % repeat purchase rate
- Reduced customer acquisition cost by 63 % through funnel optimization and lifecycle automation

SALES 2020-2023

Really cool company - Aarhus / Hamburg

Premium apparel company during international scaling phase.

- Delivered high-performance consultative sales in competitive retail environment
- Built strong customer relationships through value-driven communication
- Selected to support international store operations in Hamburg during staffing shortage
- Developed executive-level communication and persuasive storytelling skills

EDUCATION

BSc in Global Business Engineering • University • Copenhagen 2019 - 2024

Focus: Software Engineering, Systems Design & Technical Commercialization

Coursework & Focus Areas:

- Software Engineering & Systems Design
- Technical Architecture & Integration
- Data Modeling & Platform Thinking
- Business Development & Go-to-Market Strategy
- Global Business Communication

Higher Technical Examination (HTX) • High school • Copenhagen 2014 - 2017

Technical focus: Mathematics, Physics & Applied Technology
